

Kustom Shaped Wristbands

Our “**Kustom**” **Shaped** wristbands are produced by creation of a mold that resembles the desired shape of the wristband. We can create any design that consist of a single line, that also connects back to itself. The mold is created from artwork generated by staff members here at our company, from your design ideas and requests. We have thousands of images and hundreds of font styles at our disposal to help you with creation of your custom shaped silicone wristband design.

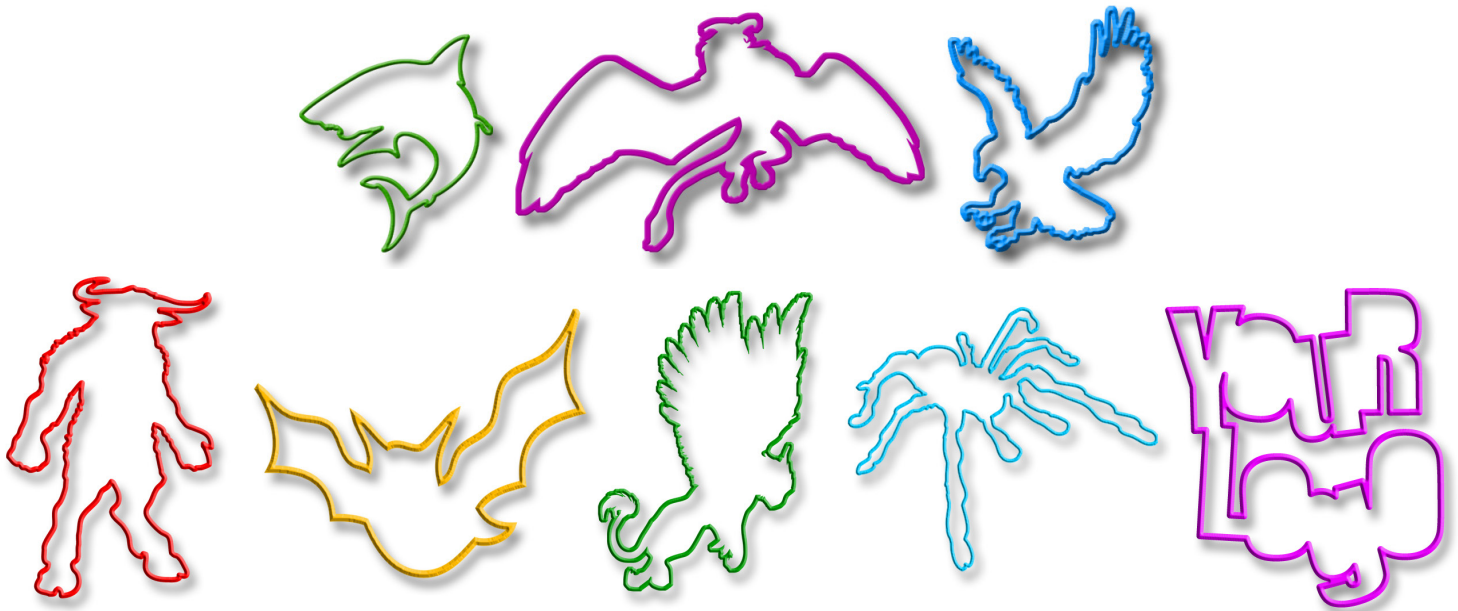

The artwork that you approve will be used to create your mold. Once the mold is created, molten silicone in the color of your choice, whether a single color, segmented colors, swirled color combinations or “glow in the dark” color is poured into the mold and allowed to cure. Once cured, the wristband is removed from the mold and inspected for accuracy and quality before being packaged for delivery.

Kustom Shaped Wristband Pricing

1,000	2,500	5,000	10,000	25,000	50,000	50,000+	75,000+
